

Adobe® Acrobat® Enterprise Program

Cost-effectively standardize on the leading PDF document creation and collaboration solution while simplifying license management, compliance, compatibility, and IT support

The Adobe Acrobat Enterprise Program (AEP) is a new enterprise licensing program designed to help organizations affordably standardize on Adobe Acrobat software for PDF document creation and collaboration. By adopting Acrobat across the entire organization, you can reduce IT costs by simplifying license management, compliance, compatibility, and IT support while maximizing workforce productivity.

Get the best desktop PDF solution at significant savings

AEP is offered through an Adobe Enterprise License Agreement (ELA), a licensing framework for enterprise-wide software acquisitions. By licensing Acrobat for 100% of your organization's desktops in an ELA, you maximize your corporate purchasing power to access the very best volume discounts that Adobe offers for Acrobat. Plus, lock in prices for the three-year agreement term.

Simplify license management

AEP eliminates the need to track individual licenses. Instead, take advantage of an annual true-up process that is based on the growth of desktops in the organization. It simplifies software compliance, provides flexibility as the organization grows, and aggregates new licenses into one annual order.

Increase IT efficiency

Reduce the total cost of ownership for Acrobat by standardizing on Adobe Acrobat X software. Reduce overall desktop overhead costs by as much as 20% by minimizing compatibility, compliance, and control issues. Tap into the latest functionality while optimizing your existing environment—Acrobat X supports Microsoft® Windows® 7 and Microsoft Office 2010, and delivers seamless integration with SharePoint.

Acrobat X delivers robust PDF file creation with a broad range of other productivity tools such as form creation and management, export to Word and Excel, digital signatures, document comparison, website capture, and document review management. The breadth of Acrobat X capabilities can further reduce IT costs by streamlining the desktop footprint and displacing existing, redundant applications.

Streamline deployment

Acrobat X significantly streamlines enterprise deployment with improved support for Microsoft System Center Configuration Manager (SCCM) and System Center Essentials (SCE), including capabilities such as automated deployments, asset intelligence, and IT policy enforcement. New support for Microsoft System Center Updates Publisher (SCUP) catalogs simplifies the process of importing and publishing updates. Automated volume licensing control for large enterprises using the Adobe Provisioning Tool for Windows® or the Apple Remote Deployment Tool for Mac OS eliminates the need for manual installations. Acrobat X also supports centralized server hosting using standard hosting environments such as Citrix Presentation Server or Windows Terminal Services. The Adobe Customization Wizard, a free downloadable utility, helps you customize the Acrobat installer and configure application features before deployment.

Maximize employee productivity

The ability to create dynamic, interactive Adobe PDF files with Acrobat X helps your workforce accelerate collaboration and drive new, more effective communications inside and outside the company. Now everyone can reliably and more securely exchange information, create shared reviews that allow participants to automatically see and build on one another's comments, and efficiently track and manage their review processes. Acrobat is also the only desktop application that can turn on collaborative functionality in free Adobe Reader® software, so Reader users can be incorporated into your organization's workflows easily and without additional expense.

AEP participation criteria

Special AEP pricing is available to commercial organizations in the United States and Canada that agree to 100% Acrobat X coverage for all desktops within a defined business entity, such as a company, business unit, or division, of at least 1,000 desktops. Organizations must sign a three-year Adobe ELA and agree to ELA terms and conditions. This program is not available under the Adobe Cumulative Licensing Program (CLP) or Transactional Licensing Program (TLP).
