

Veeam® Cloud Connect *for the Enterprise* takes *Availability* for the *Always-On Enterprise*™ higher with Microsoft Azure

The fast and secure way to back up and restore from Azure

Veeam® + Microsoft Azure deliver easy, efficient ways to get backups offsite, and into the cloud to provide *Availability* for the *Always-On Enterprise*™. Through fast backup and off-site backup storage services for Hyper-V and vSphere environments, Veeam solutions enable granular recovery from Exchange, SQL Server, Active Directory, and SharePoint. Available in the Microsoft Azure Marketplace, enterprise customers can now take advantage of cost effectiveness of cloud storage while maintaining control and oversight over their backup infrastructures.

IT'S EASY TO ADD CLOUD BACKUP

Ready!
Set!
Go!

Easy to get started

Veeam Cloud Connect *for the Enterprise* makes it easy to establish your Veeam-powered backups to Azure. With a single server and just 10 minutes, you can configure the Azure cloud infrastructure for Veeam.

Microsoft
Azure

Certified

Easy for customers

Veeam Cloud Connect *for the Enterprise* delivers:

- Off-site backups to Azure.
- Modern backup architecture with forever forward incremental backups, GFS (grandfather-father-son) retention policies and much more.

Easy for business

Veeam Cloud Connect *for the Enterprise* is already built-in to the Veeam Availability Suite™ and Veeam Backup & Replication™. Enterprise customers will need to acquire a perpetual license to enable Cloud Connect, and extend their backup infrastructure to Azure.

Easy, complete security

Veeam Cloud Connect *for the Enterprise* gives you peace of mind with end-to-end encryption. Customers can encrypt data at the source, in flight and at rest, and move data to Azure repositories quickly with built-in WAN Acceleration.

REQUIREMENTS

Veeam Cloud Connect *for the Enterprise* (VCC-E) is licensed by socket as a perpetual add-on purchase to Veeam Availability Suite or Veeam Backup & Replication™ (not Veeam Backup Essentials™). Version 8 Update 3 or higher is required. VCC-E customers must purchase a minimum of 100 sockets, although this requirement is waived for Microsoft Enterprise Agreement (EA) customers who are using Microsoft Azure. Customers are required to match the number of sockets 1:1 with their Veeam Availability Suite or Veeam Backup & Replication deployment.

Microsoft Azure

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

KEY USE CASES

WEB APPLICATIONS

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

CLOUD STORAGE

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

BIG DATA & HPC

Get actionable insights from your data by taking advantage of a fully compatible enterprise-ready Hadoop service.

MOBILE

Accelerate your mobile app development by using a backend hosted in Microsoft Azure. Scale instantly as your install base grows.

MEDIA

Create, manage, and distribute media in the cloud – everything from encoding to content protection to streaming and analytics support.

FLEXIBLE APPLICATION MODEL

Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

ALWAYS ON, ALWAYS HERE

Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

DATA CENTER WITHOUT BOUNDARIES

Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

GLOBAL REACH

With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
